### **DETAILED ACTION**

Applicant's election without traverse of group I in Paper No. 3 is acknowledged. In addition, further restriction is also deemed necessary.

#### ***Election/Restrictions***

Claims 1-33 are generic to a plurality of disclosed patentably distinct species comprising a photo-sensitive resin from the group consisting of photo-sensitive acrylic resin, photo-sensitive BCB, photo-sensitive PFCB, and photo-sensitive polyimide, and photo-insensitive resin selected from the group consisting of photo-insensitive BCB, photo-insensitive PFCB, photo-insensitive polyimide, and photo-insensitive SOG. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim
